Every bathroom is different

All our bathrooms are made to order. Please use the images in this brochure as a guide only, one of our planners will work with you to help choose the right pieces for your space. When your estimate is produced, it's your responsibility to ensure the information and specifications are all correct.

Choosing your bathroom

There's a lot to think about when you're planning a new bathroom, but you don't need to do it alone. Our experts will help you make the best choices for your home and lifestyle, and guide you through all of the options available from bathroom furniture, baths, basins and toilets to taps, shower enclosures and heated towel rails.

Planning your bathroom

Once you've chosen your bathroom, one of our expert planners will visit your home to discuss what happens next. They'll measure your bathroom and create a design that suits your style, makes the best use of the available space and works within your budget. There's a planning fee of £50 which will be deducted from your final balance.

You'll then receive a visit from one of our approved fitters to check the measurements, design and technical details, such as the heating system.

Once everything has been checked, you'll then be invited back into store where we'll provide you with an

estimate that will include everything from the suite and furniture to fitting and accessories. You'll also receive a plan of your design with colour elevations.

Once you have accepted your estimate a partner from our admin team will contact you to confirm the expected delivery and installation dates.

Installing your bathroom

Your order will be delivered to your home on the day advised. This could be a few days before the start of the installation, or depending on the project, after the work has started. Experienced installers will carry out all the work necessary, from plumbing and wiring to tiling. All gas work is carried out by Gas Safe Registered installers and all electrical work meets current Institute of Electrical Engineers (IEE) standards and complies with current building regulations.

We'll try to cause as little disruption as possible while we work, but fitting a bathroom is a complex project so you might not be able to use your bathroom for a short time and your water and electricity supply may need to be temporarily disconnected.

Doing the job properly

Installing a bathroom is complicated work. While we'll try to finish your bathroom during the initial installation period, extra work is sometimes needed, and we might need to come back again to finish the job.

Payment

Once you've agreed our estimate, you'll need to pay a 20% non-refundable deposit. The balance will be payable two weeks before the delivery day. You will receive a reminder from our admin team before this day.

We accept payment by Partnership Card, John Lewis or Waitrose account cards, Switch, Delta, Mastercard, Visa or cash.

Prices are valid for 28 days from the date shown on your estimate.

If you have any other questions about our service or would like a full set of our conditions of sale, please contact your local John Lewis shop.

Colours and designs

Although we've made every effort to ensure the images in this brochure are as accurate as possible, occasionally some colours may not be a true representation of the product. Please see a sample for actual colour.

It may be necessary for us to change designs and specifications without prior notice.

Guarantees

All our bathroom furniture, suites and accessories come with a guarantee included at no extra cost. The length of the guarantee depends on the product. Please see the range introductions for more details, or contact your local John Lewis shop for more information about our guarantees.
